## West of Chichester Development & Southern Access Road Virtual Exhibition

Following on from Wednesday's email to residents regarding the issues with the proposed design for the Southern Access Road (SAR), here is a photo of Board No. 8 The Cathedral Way Roundabout which shows the new plan in case anyone was having difficulties viewing it from the exhibition website. Don't forget to send in your feedback by 22 July to the developers (via the virtual exhibition) or to the WGRA committee at [sec.wgra@gmail.com](mailto:sec.wgra@gmail.com)

### The Cathedral Way Roundabout

#### The Cathedral Way Junction

The Southern Access Road's link to Westgate and the Sherborne Road junction has been selected following a review of various options including direct access from the A259.

The proposed junction will serve to divide the movements on the eastern and western Westgate approaches (to enhance capacity and reduce traffic concentration which is presently focused at one point (i.e. the existing Sherborne Road mini roundabout). Preliminary discussions have been held with West Sussex County Council in developing the junction options with no adverse comments received.

#### Improved Cycle & Walking Access

Priority crossing for cycles and pedestrians via a parallel crossing allows for a safer and more convenient route towards Chichester City from the site and for students accessing Bishop's Luffa School.

#### Low Speed Environment

20 mph speed limit is maintained on entry to Sherborne Road and encouraged by narrow carriageway widths and pedestrian and cycle priority features.

**Cathedral Way Roundabout**  
A full sized copy of this plan is available on the central table.

#### Alternative Options Considered

Alternative options were considered but were rejected due to identified capacity issues and excessive queuing which would block the access. Furthermore, the access option linking with the A259 would also increase U-turn manoeuvres that would impact capacity at the nearby Sherborne roundabout.

#### Key Benefits of Proposed Junction Arrangement

- The junction improvement has been modelled and is shown to operate effectively, taking into account predictions about future travel demands
- The proposals will provide appropriate visibility based on the latest design standards and signed speed limits to provide a safe access, including for coaches accessing Bishop's Luffa School
- The proposals will not increase U-turn manoeuvres on the A259 or restrict existing U-turns as undertaken by Tesco users
- It provides opportunity to enhance east west pedestrian / cycle access towards Chichester City Centre
